GSM overview

Preface

This page discusses the GSM mobile telephony system, which is increasingly popular and established throughout the world. The term **GSM** usually means the GSM standard and protocols in the frequency spectrum around 900MHz. There is also DCS1800 - GSM protocols but at different air frequencies around 1800 MHz - and in the United States, where spectrum for Personal Communication Services (PCS) was auctioned at around 1900MHz, operators using the aptly-named GSM1900 are competing against a plethora of other standards. As a result of this, the original and most widely-used GSM frequency implementation is also becoming known as GSM900, and DCS1800 is also known as GSM1800. However, although the physical frequencies used differ, the protocols and architecture remain the same.

System architecture

**Figure 4** below shows the GSM system architecture, which consists of the switching system, the base station system and the user equipment.
Area divided up into Cells each with its own Base Transceiver station (BTS) which operates on its own set of frequencies.

The BTS are controlled by their own BSC (Base station controller) which can control multiple BTS.

The BSCs are connected to the MSC (usually by land line) so the digital over air connection is from the Mobile to the BTS, the link from the BTS to the BSC can also be by land line.

MSC : Mobile Switching Centre acts as the interface to the PSTN.

3 cell repeat: possible in GSM due to higher tolerance to cross channel interference. digital timing specs etc. Other patterns apply.
Product Functionality

- Form Factor: Clamshell
- Finish: Tri-coated paint, colour TBD
- Bands/Modes: GSM : 850/900/1800/1900
  GPRS Class 10
- Size: 63 cc
- Weight: 90g
- Dimensions: 98 x 53 x 15
- Display: 176 x 220 64K TFT internal
  96 x 80 4K CSTN external
- Antenna: Internal
- TT/SB Time: TBD (700mAh Battery)
- Audio MIDI (24Ch/22Khz),
  MP3 Ring tones

Features

- Superior Design and CMF
- Internal Quad-Band Antenna
- External Picture caller ID
- Integrated VGA camera
- Integrated Class 1 Bluetooth™
- 22kHz MIDI and polyphonic speaker
- MPEG4 video playback
- 3D Graphics Engine
- UI Skinning
- SyncML
- Mini-USB connector
Physical Overview

- Camera Lens
- Speaker
- 64k TFT 176 x 220 Display
- 4k CSTN 96 x 80 CLI
- VA/VR Key
- 5way Nav Key
- Mic

This document is considered an uncontrolled document when printed
All piece parts and prices for the V3 model are available when you log into the Motorola on-line system (MOL)

Motorola On Line (MOL)

To Place your piece parts order please log in to:

http://businessonline.motorola.com

You will be asked to enter your Motorola on-line Logon ID and Password.

Part numbers and prices are subject to change without notice.
Please reference the terms and conditions on the MOL website.

If you do not have login ID and password:

Please see signup information on MOL startup page.

You will need to provide the following Information:

(A) Your company name
(B) Your company ship to address
(C) Your company billing address
(D) Contact name
Repair Categories

There are Seven (7) repair categories

(1) Major repairs – REP01- e.g. Major component replacement.

(2) Minor Repairs – RMP01 or RPR01- Simple component replacement – e.g. Non- soldered parts.

(3) Basic Repairs – RSP01 or RAS01 - e.g. Re- solder simple components, clean contacts.

(4) Batt repair – RBT01 – e.g test and or replace battery

(5) Software – SWU01 – e.g Flashing, force flashing

(6) Antenna - RAN01 – e.g test and or replace antenna.

(7) Sent-mot - FWD01 - unknown or unauthorized repairs sent to Motorola or authorized service centre

The examples above are for reference only, each repair category contains many more items than are listed here. Motorola reserves the right to add, remove or change items in each repair category from time to time.
Labour Rates

Please refer to your warranty compensation schedule for warranty labour rates.

Motorola provides a limited warranty of twelve (12) months on the V3 phone. Proof of purchase must be provided in order to validate warranty.

In order to be paid for in-warranty repairs performed in your service centre you must submit a warranty claim through Motorola Service link system.

NOTE:
Motorola will not reimburse the service centre for repairs performed on V3 units unless your technicians are trained on this specific model.
Only technicians that are Motorola trained on the V3 model are allowed to perform in-warranty repairs on the V3 phones.
Disassembly & Assembly – V3 Razor

This product contains static-sensitive devices. Use anti-static handling procedures to prevent electrostatic discharge (ESD) and component damage.

Removing and Replacing the Battery Housing and Battery

1. Ensure the phone is turned off.
2. Press in and hold the battery door latch as shown.

3. Rotate the battery cover upwards and lift it completely off the phone.

4. Lift the end of the battery first, and then remove it from the phone.
5. To replace, Align the battery with the battery compartment so the contacts on the battery match the battery contacts in the phone.
6. Insert the battery, contacts side first, into the battery compartment and push down followed by the opposite edge of the battery.
7. Insert the bottom edge of the battery cover into the rear housing, then push the top edge of the cover down and snap it into place.

Removing and Replacing the Subscriber Identity Module (SIM)

1. Remove the battery cover and battery as described in the procedures.

2. Slide the SIM card out of the phone as shown.
3. Carefully lift the SIM from the phones.
4. To replace, insert the SIM into the holder, ensuring the keyed corner of the SIM faces the outside of the phone.
5. Replace the battery and battery door as described in the procedures.

Removing and Replacing the Rear Housing

1. Remove the battery cover, battery, and SIM as described in the procedures.
2. Using a Torx driver with a T-5 bit, remove the screws at each side of the phone. Retain the screws for reassembly.
3. Release the four housing latches by inserting the pointed end of the plastic disassembly tool into the openings on the rear housing.

4. Carefully rotate the rear housing away from the front housing and flip assembly.

5. Use the disassembly tool to unseat the flex connector from it’s socket.

6. Lift the rear housing assembly away from the phone.

7. To replace, carefully align the flex connector to it’s socket on the rear housing assembly, then gently press down on the flex connector until it is properly seated in it’s socket.

8. Rotate the rear housing assembly so it sits over the phone.

9. Align the housing latches with the corresponding openings on the front housing. Gently press the housings together until the catches snap into place.
10. Replace the 2 housing screws and tighten to a final torque setting of 1.5 inch pounds. Do not over tighten.
11. Replace the antenna, SIM, battery, and battery cover as described in the procedures.

**Removing and Replacing the Antenna**

1. Remove the battery cover, battery, SIM, and rear housing assembly as described in the procedures.
2. Use the metal tweezers to grasp the rubber antenna grommets and carefully remove them from the antenna assembly. See Figure 7. Set the rubber grommets aside for reuse.

3. Use the disassembly tool to release the antenna assembly as shown in Figure 8.
4. Carefully lift the antenna assembly away from the phone.
5. To replace, align the antenna assembly to the phone.
6. Carefully press the antenna assembly into position until the antenna assembly latches snap into position.
7. Reinstall the rubber antenna assembly grommets into their slots. Each antenna grommet is uniquely shaped to fit into its respective position.
8. Replace the rear housing assembly, SIM, battery and battery cover as described in the procedures.

Removing and Replacing the Transceiver Board Assembly
1. Remove the battery cover, battery, SIM, antenna, rear housing and battery tray as described in the procedures.
2. Lift the transceiver board assembly out of the front housing with the metal tweezers. See Figure 9.

3. To replace, insert the transceiver board assembly into the rear housing.
4. Carefully and gently press the transceiver board into position and until it snaps into place.
5. Replace the antenna assembly, rear housing, SIM, battery, and battery cover as described in the procedures.
Removing and Replacing the Flip Assembly Cover
1. Remove the battery cover, battery, SIM, antenna, rear housing, and transceiver board assembly as described in the procedures.
2. Remove the 4 flip assembly screw caps.
3. Use the T-5 driver to remove the 4 screws from the flip assembly (see Figure 10). Retain the screws for re-assembly.

4. Before removing the flip cover, note the locations of the smart buttons on the sides of the flip assembly.

5. Use the disassembly tool to gently pry off the flip cover (see Figure 11).
6. Remove the smart buttons on the side of the flip assembly. Set them aside for reassembly.
7. Lift the flip cover away from the flip assembly. Be careful not to damage the display flex cable (see Figure 12).
8. To replace, insert the smart buttons into the phone. Ensure the buttons contact their respective switches on the display assembly.
9. Align the flip cover to the flip assembly, gently press the flip cover onto the flip assembly until the flip cover latches engage.
10. Insert and tighten the 4 screws to secure the flip cover to the flip assembly. Avoid damage to the flex cable.
11. Insert the 4 rubber screw covers over the flip assembly screws.
12. Replace the transceiver board assembly, rear housing, antenna assembly, SIM, battery, and battery cover as described in the procedures.

Removing and Replacing the Camera Assembly
1. Remove the battery cover, battery, SIM, antenna, rear housing, and transceiver board assembly, flip assembly cover, and CLI lens cover as described in the procedures.
2. Unlock the ZIF connector and remove the camera assembly flex connector.
3. Carefully lift the camera assembly and flex out of the flip assembly (see Figure 13).

![Fig 13](Image)

4. To replace, carefully press the camera assembly into its slot in the flip assembly.
5. Insert the end of the camera assembly flex cable into its slot in the ZIF connector on the flip display assembly. Avoid damage to the flex cable.
6. Replace the flip assembly cover, transceiver board, rear housing, antenna, SIM, battery, and battery cover as described in the procedures.
Removing and Replacing the Display Module Assembly
1. Remove the battery cover, battery, SIM, rear housing, antenna, transceiver board assembly, flip assembly cover, and camera assembly, as described in the procedures.
2. Use the disassembly tool to unseat the display module assembly flex connector from its socket (see Figure 14)

![Fig 14](image)

3. Carefully and gently lift one corner of the display module assembly out of the flip assembly.
4. Avoid damage to the electrical components on the flex while carefully removing the display module assembly from the flip assembly.
5. Carefully lift the display lens away from the flip assembly.
6. To replace, align the display module assembly to the flip assembly.
7. Carefully lower the display module into the flip assembly. Ensure that all of the display assembly components are damaged.
8. Align the flip display flex to the flex connector on the flip display assembly and gently press down on the flex connector until properly seated.
9. Replace the camera assembly, flip assembly cover, transceiver board, rear housing, antenna, SIM, battery, and battery connector as described in the procedures.

## Known Issues & Resolutions

### V3-Razr Known Issues

The repairs listed in this section are the only repairs that are allowed to be performed on the V3 phone in the field. The repair code and the problem found code must be indicated on your service link claim for each repair or the claim will be rejected.

V3-Razr Repair Manual
Service Website

Log on to the Motorola service website for more repair information. You will also find **schematic diagram**, **block diagram**, service bulletins, advisories, software downloads and more for the V3 phone.

The URL for the service website is:  
https://pcs-service.motorola.com
**Repair Codes**

Repair codes and problem found codes are to be used for all repairs performed on V3 phones. The repair code and the problem found code must be entered on your service link claim or the claim will be rejected. If multiple repairs are performed simultaneously on a particular V3 unit then all associated repair codes and problem found codes must appear on the service link claim.

**Claimable Parts**

These are the only parts that you will be allowed to claim for repairs on the V3 phone as of the publication of this manual.
